Job Description

Job Title:	Neuro-physiotherapist
Service:	Therapy Service
Based at:	Headway East London and or in the community
Contract:	Associate

Background

Headway East London (“Headway”) is a charity supporting people affected by brain injury. Working across 13 London boroughs, we offer specialist services for survivors and their family. We offer therapies, advocacy, family support and community support work alongside our day service: a community venue where people can make the most of their abilities and interests.

The therapy team at Headway provides neurological physiotherapy, occupational therapy, psychological therapies and complementary therapy.

The past several years have represented an exciting period of growth within the therapy service including the development of a small but bespoke private therapy service offering neurological therapy to individuals directly or as part of a package commissioned by a Case Manager or Personal Injury Solicitor as part of the medico-legal process.

This is an exciting opportunity for an enthusiastic, dynamic and experienced Neuro-physiotherapist to join our growing therapy team on a self-employed basis covering a caseload of clients in London.

Main Purpose

- To work as an autonomous practitioner to provide specialist physiotherapy assessment and treatment to survivors of acquired brain injury (ABI) who have been referred to the Headway private therapy service on an ‘as and when’ basis.
- To keep detailed, contemporaneous records of all physiotherapy input and draft comprehensive reports as required.

Main Duties

1. To undertake comprehensive physiotherapy assessment of individuals with complex neurological presentations as an autonomous practitioner, including the assessment of neurological impairment (including altered tone, balance, gait, vestibular problems) as well as activity limitations and participation restrictions (as defined in the ICF)
2. To draft formal assessment summaries, progress and discharge reports for the purposes of information sharing and decision making by individuals, their Case Managers and Solicitors.

3. To negotiate goal-directed intervention with individuals and / or carers to establish a realistic person-centred treatment programme, and promote an individual's choice
4. To formulate and deliver a person-centred individual treatment programmes based on a sound knowledge of evidence based practice and treatment options using clinical assessment and reasoning skills
5. To independently evaluate progress using recognised and validated outcome measures, adapting therapy as necessary
6. To assess and determine the need for adjuncts to treatment eg: splints to enhance an individual's independence; making recommendations to individuals / carers and other staff / professionals, trialling and training individuals and carers in their use
7. To maintain accurate, detailed and contemporaneous records of all physiotherapy undertaken
8. To communicate effectively and empathetically with individuals with speech, cognitive and behavioural difficulties including communicating information which may be of a complex and sensitive nature
9. To employ appropriate skills to motivate an individual in their treatment programme
10. To communicate complex information effectively to ensure collaborative working with other professionals across health and other agencies to ensure the delivery of a co-ordinated service
11. To attend multi-disciplinary team meetings feeding back on assessments of an individual's function, recommended intervention and progress
12. To carry out intervention with people with complex and challenging behaviour as a lone worker in a variety of domestic and public settings, including public transport; requiring management of unpredictable situations, a problem solving approach to risk management, empathy and negotiation skills
13. To provide advice to educational establishments, workplaces and other community resources to promote an individual's successful (re) engagement in education / work / leisure in the community within appropriate professional capacity
14. To support, advise and provide education for clients, their carers and support workers as appropriate

Other Duties

1. Be accountable for own professional action whilst recognising professional boundaries and seeking advice from own clinical supervisor and / or professional body, where appropriate
